# Fully Insulated Garages & Workspaces

*The Fastest Way to Build an  
Energy Efficient Space for  
Commercial or Residential Use*

# Get More from Your Garage, Workshop or Outbuilding

Wooden frames and steel buildings give garages and other unattached structures a bad name, reducing them to cold, sterile rooms you'd rather avoid. Realize the full potential of this space with an R-Control SIPs garage, workshop or outbuilding from Branch River. R-Control Structural Insulated Panels give you a premium insulated work or storage space at a price competitive to traditional wooden frames.

## Two standard sizes available!

## Our standard garages include the following features:

- Fully Insulated, noise reducing panels
- Architectural roof shingles
- Vinyl siding
- Two 9' X 7' garage doors
- One 9-Lite personal door
- Garage Assembly
- Stairs to second floor loft (24' x 27' only)
- Double hung windows (24' x 27' only)

## Custom garages and work spaces in any size

### The design possibilities are endless!

Do you have existing plans or have a custom idea in mind? At Branch River we can create your dream space using our R-Control Structural Insulated Panels (SIPs).

- Unlimited design possibilities for any type of structure
- Easy to use, fast, and efficient; up to 50% faster than stick framing
- Lower labor costs & reduces job site waste
- Eliminates surprises on the job site
- Comes standard with Perform Guard ® termite protection
- Warranted system

**Branch River can custom design and deliver insulated garages for residential or commercial use throughout New England (ME, VT, NH, MA, CT and RI)**
