**Foam-Control® CLIMATE™ Crawl Space**

**Stable R-value and superior moisture resistance to protect your insulation integrity.**

Foam-Control CLIMATE film-faced insulation is a cost-effective, durable, and energy efficient solution for interior crawl space wall applications. It is an ideal material to reduce energy loss through the crawl space wall.

**Advantages.**

- Film-faced for toughness
- Superior moisture resistance
- Meets code requirements for crawl space use
- No ignition barrier required
- No CFC, HCFC, HFC, or formaldehyde
- No long-term R-value loss or thermal drift

**Benefits.**

Cost effective thermal design is among the highest priorities in construction. Foam-Control CLIMATE crawl space insulation is available in a range of types necessary to provide energy efficiency, structural integrity, and cost effectiveness. Foam-Control CLIMATE is proven to lower energy costs, saving both money and precious resources.

### R-value (Thermal Resistance) for CLIMATE 100.

<table>
<thead>
<tr>
<th>R-value</th>
<th>Recommended for design in WARM climates</th>
<th>Recommended for design in COLD climates</th>
</tr>
</thead>
<tbody>
<tr>
<td>R=3.9/inch at 75°F</td>
<td></td>
<td></td>
</tr>
<tr>
<td>R=4.2/inch at 40°F</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

R-value = R-value/inch x Thickness

Foam-Control CLIMATE is available in other types with higher R-values.

**Thicknses.**

Foam-Control CLIMATE boards are available in a range of thicknesses up to 4” to meet your local energy code requirements.

**Proven to meet, or exceed, building codes.**

Foam-Control CLIMATE is manufactured to Quality Control Program standards monitored by UL LLC and recognized by national building codes.

Foam-Control EPS manufacturers offer product warranties that ensure thermal performance and physical properties. Foam-Control EPS can stand up to all industry tests — and has.

**Stands up to the elements.**

---

**Foam face-off:** Choosing Foam-Control CLIMATE over XPS and Polyiso.

- EPS can easily vary density, thickness, and size to meet project R-values
- EPS is less-expensive than XPS and ISO products
- No CFC, HCFC, HFC, or formaldehyde in Foam-Control EPS
- No long-term R-value loss or thermal drift
- Foam-Control EPS with 

---

* Perform Guard is not a barrier, but should be used in conjunction with a total Pest Management Program available from a reputable Pest Control Operator.
Foam-Control EPS with Perform Guard.

One of the most destructive forces anywhere is termites. Foam-Control CLIMATE can be manufactured with Perform Guard, a proven and safe additive, that effectively resists termites.

Perform Guard®
- Meets code requirements for ground contact use
- Resistant to termite damage
- Incorporates EPA registered additive
- Safe for handling and noncorrosive

Foam-Control CLIMATE means control, not compromise.

Foam-Control CLIMATE insulation is engineered to give you the greatest possible control for your interior crawl space system applications: from design and timelines, to materials and costs, and—ultimately—control over your results.

In the building industry, Foam-Control CLIMATE insulation is among the most versatile, energy efficient, and cost effective insulators available, delivering extremely high, stable R-values. Depend on Foam-Control CLIMATE to do the job.

Ready to take control? Start here.

If you’re starting to wonder how Foam-Control CLIMATE insulation can contribute to your next project, here’s how to find out: Just contact your nearest Foam-Control CLIMATE manufacturer. They’ll be happy to give you a design consultation, information about Foam-Control EPS insulation products, pricing, calculating insulation requirements and the answers to all your questions.
