Foam-Control® *CLIMATE*™

**Exterior Sheathing**

Superior air blocking, moisture resistance, and stable R-Value to protect your insulation integrity.

Foam-Control CLIMATE film-faced insulation is a cost-effective, durable, and energy efficient solution for insulated sheathing applications. It is an ideal material to provide a code compliant air and weather resistant barrier and reduce energy loss through framing members.

**Advantages.**

- Film-faced for toughness
- Air Barrier
- Weather Resistive Barrier
- Superior moisture resistance
- Low water vapor permeability
- No CFC, HCFC, HFC, or formaldehyde
- No long-term R-value loss or thermal drift

**R-Value (Thermal Resistance) for CLIMATE 100.**

<table>
<thead>
<tr>
<th>R=3.9/inch at 75°F</th>
<th>Recommended for design in WARM climates</th>
</tr>
</thead>
<tbody>
<tr>
<td>R=4.2/inch at 40°F</td>
<td>Recommended for design in COLD climates</td>
</tr>
</tbody>
</table>

R-value = R-value/inch x Thickness

Foam-Control CLIMATE is available in other types with higher R-values.

**Thickness.**

Foam-Control CLIMATE boards are available in a range of thicknesses up to 4” to meet your local energy code requirements.

Foam-Control CLIMATE is also available in a fanfold configuration in 3/8, 1/2, and 3/4 inch thicknesses.

**Proven to meet, or exceed, building codes.**

Foam-Control CLIMATE is manufactured to Quality Control Program standards monitored by UL and recognized by national building codes.

Foam-Control CLIMATE complies with Building Code requirements for:

- ASTM E331, Standard Test Method for Water Penetration of Exterior Windows, Skylights, Doors, and Curtain Walls by Uniform Static Air Pressure Difference

**CONTROL, NOT COMPROMISE.®**

**Foam face-off:**

Choosing Foam-Control CLIMATE over XPS and Polyiso.

- EPS can easily vary density, thickness, and size to meet project R-values
- EPS is less-expensive than XPS and ISO products
- No CFC, HCFC, HFC, or formaldehyde in Foam-Control EPS
- No long-term R-value loss or thermal drift
Foam-Control CLIMATE means control, not compromise.

Foam-Control CLIMATE insulation is engineered to give you the greatest possible control for your wall sheathing system applications: from design and timelines, to materials and costs, and—ultimately—control over your results.

In the building industry, Foam-Control CLIMATE insulation is among the most versatile, energy efficient, and cost effective insulators available, delivering extremely high, stable R-values. Depend on Foam-Control CLIMATE to do the job.
