Foam-Control® CLIMATE™
Roof Recovery Board

An efficient solution for re-roof and over-deck applications.
Foam-Control CLIMATE comes with factory applied plastic film facings compatible with Single-Ply Membrane roofing systems. Foam-Control CLIMATE can be applied directly over existing roof membranes and structural roof decks providing a one step recovery board insulation resulting in reduced material and labor costs of roofing.

Advantages.
- Film-faced for toughness
- Superior moisture resistance
- No CFC, HCFC, HFC, or formaldehyde
- No long-term R-value loss or thermal drift

Benefits.
Foam-Control CLIMATE is compatible with the most widely used Single-Ply roofing assemblies. Additional benefits such as fanfold consolidation, resistance to moisture, and high R-value make Foam-Control CLIMATE the preferred re-roofing and over-deck solution for Contractors, Architects and Engineers. It is the most cost-effective roofing recovery board insulation on the market.

Foam-Control CLIMATE is for use with a variety of Single-Ply systems, including TPO, EPDM, PVC, CPE, CSPE, EIP, NBP, and TPA.

Thickness.
Foam-Control CLIMATE fanfold is available in 3/8, 1/2, and 3/4 inch thicknesses.
Foam-Control CLIMATE boards are available in a range of thicknesses up to 4” to meet your local energy code requirements.

R-value (Thermal Resistance) for CLIMATE 100.

<table>
<thead>
<tr>
<th>R-value</th>
<th>Recommended for design</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.9/inch at 75°F</td>
<td>in WARM climates</td>
</tr>
<tr>
<td>4.2/inch at 40°F</td>
<td>in COLD climates</td>
</tr>
</tbody>
</table>

R-value = R-value/inch x Thickness
Foam-Control CLIMATE is available in other types with higher R-values.

Proven to meet, or exceed, building codes.
Foam-Control CLIMATE is manufactured to Quality Control Program standards monitored by UL LLC and recognized by national building codes.

Foam-Control EPS manufacturers offer product warranties that ensure thermal performance and physical properties. Foam-Control EPS can stand up to all industry tests—and has.
Foam-Control CLIMATE means control, not compromise.

Foam-Control CLIMATE insulation is engineered to give you the greatest possible control for your roofing system applications: from design and timelines, to materials and costs, and—ultimately—control over your results.

In the building industry, Foam-Control CLIMATE insulation is among the most versatile, energy efficient, and cost effective insulators available, delivering extremely high, stable R-values. Depend on Foam-Control CLIMATE to do the job.
