Foam-Control® EPS Geofoam Vegetative Roofs

A lightweight, easy to install insulation and fill material for Vegetative Roofs.

Foam-Control EPS is a cost effective, durable, time saving, and light weight insulation and fill solution for vegetative roof designs. Vegetative roofs add weight for soil/growing medium, planters, pavers, plantings, etc. on the structural roof deck. Foam-Control EPS reduces weight resulting in a more economical structural roof deck and provides insulation that results in energy savings.

Advantages.

- Super lightweight compared to other fills
- Allows for mixing intensive and extensive designs
- Easy fabrication for landscaping contours
- Provides insulation performance
- No CFC, HCFC, HFC, or formaldehyde and is 100% recyclable

Benefits.

Effective structural and thermal design are among the highest priorities in vegetative roof design. Foam-Control EPS Geofoam is available in a range of strengths and R-values necessary to provide the most cost effective structural and thermal design solutions for vegetative roofs.

Properties.

Sizes and Shapes.

Foam-Control EPS can be made in large or small, thick or thin sections. It can be custom cut in sizes ranging from a few square inches up to 3’ x 4’ x 16’. Shop drawings for custom projects are easily produced on computer aided cutting equipment.

Foam face-off: Choosing Foam-Control EPS Geofoam over other insulation and fill materials for vegetative roof designs.

- EPS Geofoam can easily vary strength, thickness, and size
- EPS Geofoam arrives ready to place in all weather conditions
- EPS Geofoam is the best value lightweight and insulation fill material.
- EPS Geofoam blocks add very little weight to the roof deck.
- EPS Geofoam can be fabricated to create more landscape design possibilities
- EPS Geofoam is 100% recyclable
Proven to meet, or exceed, building codes.

Foam-Control EPS can stand up to all industry tests—and has. No other EPS can say that.

Foam-Control EPS means control, not compromise.
Foam-Control EPS Geofoam is engineered to give you the greatest possible control for your vegetative roof application: from design and timelines, to materials and costs, and—ultimately—control over your results.

Ready to take control? Start here.
If you’re starting to wonder how Foam-Control EPS Geofoam can contribute to your next vegetative roof project, here’s how to find out: Just contact your nearest Foam-Control EPS Geofoam supplier. They’ll be happy to give you a design consultation, information about Foam-Control EPS Geofoam products, pricing, and the answers to all your questions. Contact a sales rep and download Foam-Control EPS Geofoam documentation at www.geofoam.com.
