When you choose Foam-Control® EPS, you’re ordering more than a foam product. You’re starting a collaboration with a team of problem-solving experts who work with you on every aspect of your project. We’re here to answer your questions, provide cost-effective solutions, and do everything we can to make sure your project proceeds smoothly and ends successfully — with you in control every step of the way.

Foam-Control EPS products are manufactured by a network of licensed companies throughout North America and the world. Foam-Control EPS facilities adhere to strict, consistent standards to ensure uniformly high-quality EPS used for industrial applications in packaging and OEM products.

The Foam-Control EPS network gives design engineers, purchasing agents and operations managers the best of both worlds: the resources of a nationwide manufacturer of EPS products, and the superior attention and customer service of a local supplier.
In packaging and OEM products, quality begins with the foam: Foam-Control® EPS.

Foam-Control EPS includes an ingredient you won’t find in other EPS products: Control. Foam-Control EPS gives you control over the performance of your packaging and products. You determine the shape and specs of the EPS components you need, then your Foam-Control EPS manufacturer works with you to deliver them on time and within budget.

EPS is an amazingly strong and versatile material. Consisting of over 90% air, Foam-Control EPS provides protection, cushioning and ecologically safe insulation properties. By adding control to the mix, Foam-Control EPS users have achieved some impressive results:

- RV coach body insulation that improves comfort while giving rigidity and strength.
- Window packaging that reduces both shipping cost and damage.
- Temperature-control packaging that preserves foods, medical supplies and other temperature-sensitive materials for long-distance shipping.
- Casting patterns that produce more precise aluminum engine blocks, reducing cost and speeding production time.
- Garage door cores that save energy, help the environment and add strength and durability.

An inspiration for engineering.

Few materials offer the custom engineering properties of Foam-Control EPS. The Foam-Control EPS manufacturer is there to help problem solve by assisting you in engineering unique solutions for protective packaging and OEM products. With knowledge of what’s been tested and proven in different applications, they will work with you on the design, the materials, the processes, the quality and — ultimately — the success of your finished packaging or OEM part. The control you get with Foam-Control EPS means that you can achieve packaging and product designs that wouldn’t be possible with other materials.

A no-brainer for purchasing.

For more than 60 years, EPS has been the material of choice for strength, lightweight protection, price and versatility. Whether it’s a small or large production run, the control you get with Foam-Control makes EPS the best choice. Consider logistics: Your nearest Foam-Control EPS manufacturer can help coordinate production of your Foam-Control EPS product anywhere in the country through the Foam-Control EPS network. You develop specs, designs and prototypes locally, then manufacture close to your production facilities or customers.

Foam-Control EPS provides the thermal, cushioning, strength and lightweight qualities that enhance your product’s performance.

A breeze for operations.

Control means that your Foam-Control EPS packaging and OEM products can be designed to make your operations run smoothly, and will complement your packaging and manufacturing processes.

Foam-Control EPS components are quick and easy to assemble; no special handling is required. And even though Foam-Control EPS has a national presence, we’re also the best local vendor you’ve ever worked with, offering great customer service, proven systems and on-time delivery.
It’s more than a foam.

When you choose Foam-Control® EPS, you’re ordering more than a foam product. You’re starting a collaboration with a team of problem-solving experts who work with you on every aspect of your project. We’re here to answer your questions, provide cost-effective solutions, and do everything we can to make sure your project proceeds smoothly and ends successfully — with you in control every step of the way.

Foam-Control EPS products are manufactured by a network of licensed companies throughout North America and the world. Foam-Control EPS facilities adhere to strict, consistent standards to ensure uniformly high-quality EPS used for industrial applications in packaging and OEM products.

The Foam-Control EPS network gives design engineers, purchasing agents and operations managers the best of both worlds: the resources of a nationwide manufacturer of EPS products, and the superior attention and customer service of a local supplier.
**For packaging:**
**Protection without compromise.**

Foam-Control EPS gives you the flexibility to create the perfect protection for your product, and reduce shipping costs:

- Available in a range of densities/Types for strength and cushioning.
- Shape mold or fabricate into almost any shape.
- Easily combined with other materials.
- Superior insulation value for temperature-sensitive products.
- Promotes recyclable and reduced packaging.

---

**For OEMs:**
**Tiny beads that expand into great products.**

Foam-Control EPS provides the control for design and performance you need to cost-effectively enhance your product’s value:

- Ideal for strong, lightweight components in garage doors, refrigerators, compressors, cabinets, insulation and more.
- Ideal for lost foam casting.
- Versatile production: cut, shape mold, laminate and fabricate.
- Superior insulation value for applications needing temperature control.
- Meets a wide range of industry specifications and certifications.

---

Foam-Control EPS always comes in green.

Foam-Control EPS helps make your packaging and OEM parts environmentally friendly. It’s 100% recyclable. It can be ground into granules and reincorporated into new Foam-Control EPS products. Or it can be thermally processed into a resin that’s used to manufacture other new products.

**Foam-Control EPS:**

- 100% Recyclable
- Is inert and stable
- Does not produce contaminating leachates
- Has never contained CFC, HCFC or HFC, all of which are harmful to the earth’s ozone layer

CONTROL, NOT COMPROMISE.

CONTROL YOUR:
- DESIGN
- QUALITY
- COSTS
- LOGISTICS
- PROTECTION
- REPUTATION

DON'T COMPROMISE YOUR:
- INNOVATION
- PRODUCT INTEGRITY
- PROFITABILITY
- DELIVERY COMMITMENTS
- DAMAGE LIABILITY
- CUSTOMERS
