Foam-Control EPS includes an ingredient you won’t find in other EPS products. Control. Foam-Control EPS gives you control over the performance of your cushion protective packaging. You determine the shape and specs of the EPS components you need, then your Foam-Control EPS supplier works with you to deliver them on time and within budget.

Foam-Control EPS cushion protective packaging is custom fabricated by hot wire cutting with computer aided design, and if necessary, assembled together to provide a packaging solution specific to your needs. This method is well-suited for lower volume product lines where tooling costs cannot be justified, yet a custom part is still required. This method allows you maximum protection without the tooling expense associated with custom molded parts.

EPS is an amazingly strong and versatile material. Consisting of over 90% air, Foam-Control EPS provides protection, cushioning and ecologically safe insulation properties.

Foam-Control EPS means that you can achieve packaging and product designs that wouldn’t be possible with other materials.
Foam-Control EPS always comes in green.

Foam-Control EPS helps make your packaging parts environmentally friendly. It’s 100% recyclable. It can be ground into granules and reincorporated into new Foam-Control EPS products. Or it can be thermally processed into a resin that’s used to manufacture other new products.

Foam-Control EPS:
• 100% Recyclable
• Is inert and stable
• Does not produce contaminating leachates
• Has never contained CFC, HCFC or HFC, all of which are harmful to the earth’s ozone layer
• Promotes recyclable and reduced packaging

Environmental Role of Packaging.

Cushion protective packaging has the important environmental role in reducing damage and breakage to manufactured products. Broken, unusable products end up in landfills, which are rapidly filling up. Products damaged in shipment need to be remanufactured. Additional raw materials are used to replace them. More fossil fuels have to be burned, creating more carbon dioxide emissions.

Foam-Control EPS Availability.

Your nearest Foam-Control EPS packaging supplier will be happy to collaborate with you to determine your needs for Foam-Control EPS. He will work with you on the design, the materials, the processes, the quality and – ultimately – the success of your finished packaging part.
