

Stadium Seating

A lightweight, easy to use material for quick installation.

Branch River geofoam is a cost-effective, durable, and time saving solution for stadium seating. Cost effective structural design is among the highest priorities in construction. Branch River geofoam is available in a range of strengths necessary to provide structural integrity and cost effectiveness. Geofoam is proven to lower installation costs.

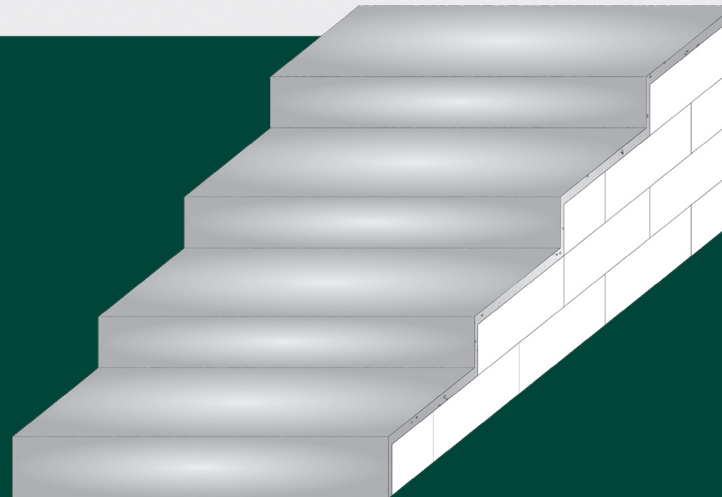

- Quicker Installation
- Precut blocks available to match custom project configurations
- Lightweight with high strength
- Excellent adhesion to concrete

Compressive Resistance.

	Compressive Resistance @ 1% deformation	
12	psi psf (kPa)	2.2 320 (15)
15	psi psf (kPa)	3.6 520 (25)
19	psi psf (kPa)	5.8 840 (40)
22	psi psf (kPa)	7.3 1050 (50)
29	psi psf (kPa)	10.9 1570 (75)
39	psi psf (kPa)	15.0 2160 (103)
46	psi psf (kPa)	18.6 2680 (128)

Sizes and Shapes.

Branch River geofoam can be made in large or small, thick or thin sections. It can be custom cut in sizes ranging from a few square inches up to 3' x 4' x 16'. Shop drawings for custom projects are easily produced on computer aided cutting equipment.

FOAM FACE-OFF: Choosing Branch River geofoam over light gauge metal framing and structural steel.

- Branch River geofoam installs faster
- Branch River geofoam can easily vary strength, thickness, and size
- Branch River geofoam is less-expensive than light gauge metal framing and structural steel
- Branch River geofoam is more easily fabricated into different shapes
- Branch River geofoam allows for more design possibilities
- Branch River geofoam provides a solid foundation and eliminates a void which is a detriment to acoustics

Proven to meet, or exceed, building codes.

Branch River geofoam Geofoam is manufactured under an industry leading quality control program monitored by UL and further recognized in UL Evaluation Report UL ER11812-01. Branch River geofoam meets ASTM D6817, "Standard Specification for Rigid, Cellular Polystyrene Geofoam."
